*Your Sound Solution™*

The new weatherproof Boston Acoustics Rock Speakers are available in three speaker configurations, including the Voyager RK5 (5¼-inch bass unit), Voyager RK6T2 (6½-inch bass unit) and Voyager RK8T2 (8-inch bass unit). All speakers are designed to blend gracefully with virtually any outdoor environment and all are specially voiced for open-air environments. The Voyager rock speakers are available in three different rock formations: New England Granite, Sandstone and River Rock. For the best audio reproduction capabilities, the Rock Speakers feature powerful mica-filled woofers with a butyl rubber surround. A custom-stepped basket on all models further enhances woofer performance by moving the woofer flush with the surface of the enclosure, minimizing the sonic "tunnel effect." High-performance tweeters in the series include ¾-inch soft domes for the RK5 and dual 1-inch soft domes in the RK6T2 and RK8T2 models.

The Voyager RK5 is in a mono configuration and the Voyager Models RK6T2 and RK8T2 are dual tweeter stereo models that employ a dual voice coil woofer and separate tweeters capable of providing stereo sound from a single speaker. All feature a unique grille design that blends into the surface of the enclosure and are voiced to match with other models in Boston Acoustics Voyager line of outdoor audio solutions. Each model also features a recessed weatherproof cavity on the on the bottom that can house an optional 70/100 Volt Transformer for use in light commercial installations such as restaurants and bars or in full commercial applications like malls, theme parks and large retail spaces using constant voltage to drive multiple speakers. The tough and durable outdoor speakers feature waterproof and rustproof hardware, grilles and connectors and are designed to withstand the harshest outdoor weather and temperature extremes.

Specifications	RK5	RK6T2	RK8T2
Bass Unit	5¼" (135mm)	6½" (165mm)	8" (200mm)
Tweeter	¾" Soft Dome	2 - 1" Soft Dome	2 - 1" Soft Dome
Frequency Response (±3dB)	70Hz-20kHz	60Hz-20kHz	50Hz-20kHz
Recommended Amplifier Power	5-100 watts	10-150 watts	20-200 watts
Sensitivity	89dB	89dB	89dB
Dimensions* (HxWxD)	12½ x 10 x 11½" (352 x 3254 x 285mm)	16 x 12¾ x 11½" (407 x 320 x 285mm)	18½ x 14½ x 13½" (470 x 376 x 341mm)

\*Dimensions vary by rock formation.
